David Katzmire aka Big Elf of "The Web Elves" <http://www.thewebelves.com>.

David Katzmire is excited by where we are as a nation. Due to his discoveries of the ebb and flow of the cycles of time over the course of decades of research and meditation, David formulated a concept he refers to as "Kala-Rhythms" through which he has been able to map the cycles that occur on the planet, in a nation, and in a human being with mathematical precision. Having birthed his own version of bio-rhythms that has application to the larger and more local cycles of time, David has effectively re-dated the birth of this country through this remarkable and innovative understanding of cycles he has originated.

Today, in respect to the water theme we've been exploring, we'll learn about the light Kala-Rhythms can shed on water. You could say that it is all in the Tides of Time.
