Tuesday, April 6: This evening's guest is scholar **David Katzmire**, who has developed an understanding of the flow of time in cyclical patterns called **Kalarhythms**. David started out to predict the rise and fall of stocks for making a lot of money but soon found that he had happened upon a way of understanding the rhythms of nature as they show up in human nature, and of course by extension, human society. Tune in for a very interesting show of how our physical, psycho-emotional, intellectual and spiritual cycles ebb and flow in fairly predictable patterns.
